"The objects of the Audit Bureau of Circulations shall be to issue standardized statements of circulation data or other data reported by a member; to verify the figures shown in these statements by auditors' examination of any and all records considered by the Bureau to be necessary; and to disseminate data for the benefit of advertisers, advertising agencies, and others interested in facts in the advertising and publishing industry.

"Each member's statement and each Audit Report issued by the Bureau shall embrace figures and facts bearing on the quality as well as the quantity of circulation data and other data reported. The figures in the Audit Report shall be those verified by the Bureau auditors.

"Facts, without opinion, to be reported."

ABC:

AN INTRODUCTION

ABC — Created to Meet a Need

ABC was formed in 1914 when advertisers, advertising agencies and publishers established ground rules for circulation auditing. ABC was created to enforce those rules and to provide audited circulation information to both the buyers and the sellers of advertising space.

The need for audited circulation stemmed from the need for credibility. Publishers needed independent verification to sell advertising space and to provide a basis for their rates. Advertisers and advertising agencies needed to know their print media decisions were being based upon independently verified circulation data.

These needs persist today although methods of buying and selling print advertising space have changed. ABC continues to serve its members by providing needed data in useful formats.

Verified Circulation

While today's media planning is dependent upon a variety of research — subscriber demographics, for instance — the cornerstone of all this data continues to be verified circulation figures.

Many publishers base their advertising rates on circulation. Buyers use circulation figures to decide where their advertising budgets should be spent. With an ABC audit, publishers can offer buyers an independent verification that their circulation claims are accurate.

ABC auditors examine and evaluate publishers' circulation claims by checking such items as press runs, distribution methods and financial records.

The auditors' findings become the Audit Report, an ABC-produced report containing comprehensive breakdowns of the publication's paid circulation and, where ABC rules allow, an analysis of non-paid circulation. Audits generally are conducted annually, although some smaller circulation publications have audits done every other year.

ABC Reports

ABC provides circulation information to its members in a variety of reports and formats. Audit Reports are supplemented every six months by statements that publisher members submit to ABC. These Publisher's Statements, which are subject to audit, are issued by ABC to provide the most up-to-date information possible.

From these basic reports come a number of other reports. For instance, FAS-FAX reports compile pertinent information from all Publisher's Statements.

Most circulation information is available either in hard-copy formats or electronically through ABC's Circulation Data Bank. The Data Bank maintains county circulation and household data on the newspapers and periodicals in the service. Members can request custom reports that can include specific ABC data, the member's own proprietary data and other information. Data Bank report formats include personal computer diskettes, laser-printed reports, magnetic tape, annual reference volumes and on-line through timesharing services.

FOREWORD

The ABC FACTBOOK has been published annually since 1971, when it was developed at the request of Canadian media planners for a convenient and comprehensive reference source on newspaper circulation and coverage in Canadian markets.

Data reported in this Factbook are derived from the latest ABC Audit Report for each member newspaper. Much of the circulation data reported herein can be readily updated from subsequent ABC FAS-FAX and member Publisher's Statements.

In addition to the Factbook, ABC offers a variety of computer generated Data-bank services covering county-unit tabulations structured to meet the user's specific requirements. Data-bank services are available without charge to ABC members. Further information on these services is available on request from any ABC office.

INTRODUCTION

The Canadian FACTBOOK consists of three major parts, plus a map section. Part I contains five sections of data for Daily, Saturday and Sunday issues of daily newspaper members and the markets they serve. Part II provides circulation and coverage data for weekly newspaper members. Part III provides circulation and coverage data for both daily and weekly member newspapers. Each section is printed on a different color for easy reference. Provincial maps at the back of this volume depict boundaries as defined in the 1986 census. Only those towns where ABC member newspapers are located, plus others which have a census population of 1,000 or more, are included.

Section A - Individual Newspaper Circulation by Market, County, Census Division

Section A of Parts I and II show paid circulation coverages from the most recent ABC Audit Report for each member. These data are reported alphabetically within provinces which are listed geographically from east to west.

County and Census Division circulation analysis follows the listing of market circulation averages. Paid circulation not analyzed by county or census division, is included in the "Remainder of Circulation" total. An asterisk identifies each newspaper's county or census division of publication.

The circulation/occupied household ratio is reported for each reporting market. The percentage of total paid circulation is shown for each component figure. Map reference coordinates shown for each newspaper's city of publication will aid in locating markets on maps, pages 267-286.

French language newspapers are identified with the code (F) following the newspaper name.

Section B - County and Census Division Circulations

These alphabetical listings of counties or census divisions by province in Parts I and II show circulation and household coverage ratios of each member paper with significant circulation in the area.

Section C - Daily and Weekly Newspaper Circulation

These sections in Parts I and II provide daily newspaper circulation and coverage in major markets and weekly newspaper circulation in alphabetical sequence by province and city.

Section D - Five Year Circulation Trends in Metropolitan Areas

Section D of Part I provides five year circulation and coverage data for all daily newspapers in the 24 census metropolitan areas.

Section E - Ranking by Circulation Size

Section E of Part I ranks daily newspapers by total circulation.

Map Section

Provincial maps, placed at the back of this book, depict county or census division boundaries as defined in the 1986 census. Only those towns which contain an ABC publisher member, and others with 1,000 plus populations, are shown.

Map reference coordinates shown in each newspaper city of publications will aid in locating markets on maps.

USERS GUIDE TO PART I
DAILY NEWSPAPER ANALYSIS

Part I analyzes circulation data for daily newspapers and the markets they serve. Each of the five sections is printed on a different color for ease of reference. Map reference coordinates relate to provincial maps on pages 267-286.

Section A - Daily Newspaper Circulation by Market, County, Census Division

This section lists paid circulation averages for each newspaper, extracted from the most recent ABC Audit Report. Separate figures are reported for each of the established market areas and for the total average paid circulation. Circulation figures are also reported for Census Metropolitan Areas. Listings for all newspapers published within these census-defined markets report circulation for the market within which each is published.

The individual newspaper's county or census division circulation data follows the listing of market data. Home market circulation is shown plus figures for other counties or census divisions where the newspaper reports circulation of at least 250 copies or a 5% circulation/occupied household ratio. Other paid circulation is included in the "Remainder of Circulation" total.

Occupied households shown for newspaper markets and Census Metropolitan Areas are ABC estimates for the year in which the audit period ended. Occupied households for Counties and Census Divisions are 1988 estimates.

It should be noted that circulation figures for Census Metropolitan Areas, Counties and Census Divisions are extracted from Paragraph 3 of ABC Audit Reports and, as such, do not necessarily represent the average for all daily issues. Under ABC rules, a separation of averages is required where daily circulation on a given day or days is considered abnormally high or low.

Section B - County and Census Division Circulation & Coverage

This alphabetical listing of counties or census divisions by province reports the circulation and circulation/occupied household ratio of all daily newspaper members having at least 250 copies or 5% circulation/occupied household ratio. As in Section A, 1988 occupied household estimates are shown.

Section C - Major Market Circulation & Coverage

Publisher reported or ABC compiled circulation data coupled with 1988 estimated population and occupied households are provided in this section for major markets where ABC member daily newspapers circulate. These major markets are listed by size, according to the total market population. Map reference coordinates are provided to aid in locating markets, pages 267-286.

Newspaper circulation within these census-defined areas with the circulation/occupied household ratio is shown for all member daily newspapers having at least 500 circulation in the area. Newspapers published in the market area are identified by an asterisk.

Section D - Five Year Circulation Trends In Metropolitan Areas

Five year trend data on circulation of daily newspapers in the 24 Census Metropolitan areas are included in this report for the first time. These include coverage ratios, single copy sales, subscription sales and their proportions of total circulation.

Section E - Circulation Rankings

The table in this section ranks daily newspapers by total circulation for each edition.

For the vacation that you missed because the media plan was still up in the air, you *could* have been in the air!

When the media plan is being rewritten for the fifth time on the first day of your vacation, you should have called the Circulation Data Bank.

This comprehensive service saves countless hours while producing up-to-date reports with the full credibility of the Audit Bureau of Circulations.

ABC member companies and advertising agencies can solve complex media planning problems through three flexible applications.

Customized Reports, which come to you in computer print outs, magnetic tape or PC diskettes; *On-Line Services,* which provide instant access through the assistance of leading media time-sharing companies; or various annual *Data Bank Reference Publications.*

For more information and your copy of the Circulation Data Bank Portfolio, call or write: Lisa Salems, Audit Bureau of Circulations, 900 N. Meacham Road, Schaumburg, IL 60173-4968. Telephone: 312-885-0910.

For the client that had you spend a Saturday fishing for more information, you *could* have been fishing!

Late nights and long weekends spent fishing for critical media data should be a task of the past. ABC's Circulation Data Bank can do your time-consuming "fishing" for media data in a fraction of the time, and prepare up-to-date reports in any one of three flexible applications.

1. *Customized Reports*, prepared according to your requirements, and sent to you as computer print outs, magnetic tape or on PC diskettes.

2. *On-Line Services*, making critical comparative data immediately available through the assistance of leading media time-sharing companies.

3. *Data Bank Publications*, prepared annually for easy desk-top reference.

For your Data Bank Portfolio, call or write: Lisa Salems, Audit Bureau of Circulations, 900 North Meacham Road, Schaumburg, IL 60173-4968. Telephone: 312-885-0910.

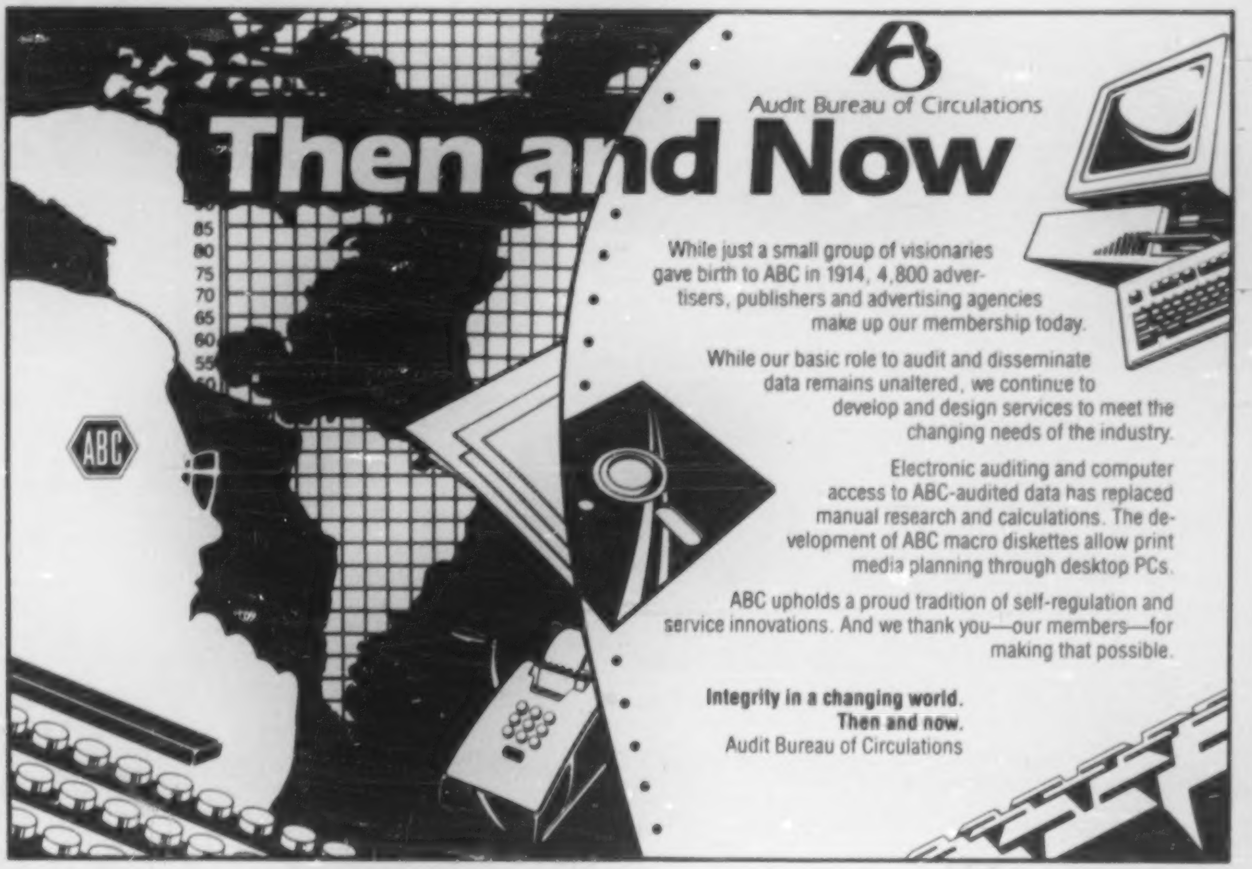
(H) WHITEHORSE STAR IS PUBLISHED EVENING (MONDAY TO FRIDAY). AVERAGES REPORTED ARE: MONDAY TO THURSDAY; FRIDAY.



While just a small group of visionaries gave birth to ABC in 1914, 4,800 advertisers, publishers and advertising agencies make up our membership today.

While our basic role to audit and disseminate data remains unaltered, we continue to develop and design services to meet the changing needs of the industry.

Electronic auditing and computer access to ABC-audited data has replaced manual research and calculations. The development of ABC macro diskettes allow print media planning through desktop PCs.

ABC upholds a proud tradition of self-regulation and service innovations. And we thank you—our members—for making that possible.

Integrity in a changing world.
Then and now.
Audit Bureau of Circulations

USERS GUIDE TO PART II
WEEKLY NEWSPAPER ANALYSIS

Part II of the ABC Canadian Newspaper FACTBOOK provides analyses of data for ABC member Weekly Newspapers.

Each of the three sections in this part is printed on different color paper for easy reference. Map reference coordinates used in this book are for the Provincial maps appearing on pages 267-286.

Weekly newspaper members of ABC are audited annually when published in the city or City Zone of a daily newspaper member and bi-annually in other areas. Members of a group audit plan may be audited less frequently but at least once every four years. In Section A, a crosshatch symbol is used to identify those newspapers which are audited annually.

Occupied households for Counties and Census Divisions are 1988 estimates.

Section A - **Weekly Newspaper Circulation by Market, County, Census Division**

This section lists total paid circulation averages for each newspaper, as reported in the most recent ABC Audit Report.

Each newspaper's county or census division circulation data follows the listing of total circulation averages. Home market circulation is shown plus any county or census division where a newspaper reports circulation of at least 250 copies or a 5% circulation/occupied household ratio. Other paid circulation is included in the "Remainder of Circulation" total.

Section B - **Weekly Newspaper County and Census Division Circulation & Coverage**

This alphabetical listing of counties or census divisions by province reports the circulation and circulation/occupied household ratio of all Weekly Newspaper members having at least 250 copies or 5% circulation/occupied household ratio.

Section C - **Circulation of Weekly Newspapers by Province and City**

Circulation of each ABC Weekly Newspaper member is reported in alphabetical sequence by province and city. Separate columns identify home county or census division, frequency of publication and total average paid circulation.

Access ABC's FAS-FAX in an instant!

The Audit Bureau of Circulations FAS-FAX report is a great reference source for the latest summary circulation data. Issued twice a year, FAS-FAX reports covering U.S. and Canadian daily and weekly newspapers contain select data from ABC members' Publisher's Statements.

FAS-FAX reports are available in a handy desk reference book.

Now, FAS-FAX — and many other ABC reports — are also available on 5¼-inch and 3½-inch personal computer diskettes from ABC's Data Bank. Formatted in a Lotus 1-2-3 spreadsheet, FAS-FAX diskettes are available to members for $55.

To learn more about ABC's Data Bank reports and to receive a free catalog describing ABC's Data Bank services, contact Lisa Salems,
Audit Bureau of Circulations,
900 N. Meacham Road,
Schaumburg, IL 60173-4968
312/605-0909. (After Nov. 11, 1989, call 708/605-0909.)

USERS GUIDE TO PART III
DAILY AND WEEKLY NEWSPAPER ANALYSES

Part III of the ABC Canadian Newspaper FACTBOOK provides analyses of County and Census Division Circulation & Coverage for both Daily and Weekly ABC member newspapers within the same listings. For easy reference, the section is printed on the same color paper as the corresponding sections in Parts I and II.

An explanation of the data shown for Daily Newspapers in this section may be found on page 1 and for Weekly Newspapers on page 145.

Occupied households in Section A for Counties (Census Divisions) are 1988 estimates.

Map reference coordinates used in this book are for the provincial maps appearing on pages 267-286.

ABC:

AN INTRODUCTION

Created to Meet a Need

ABC was formed in 1914 when advertisers, advertising agencies and publishers established ground rules for circulation auditing. ABC was created to enforce those rules and to provide audited circulation information to both the buyers and the sellers of advertising space.

The need for audited circulation stemmed from the need for credibility. Publishers needed independent verification to sell advertising space and to provide a basis for their rates. Advertisers and advertising agencies needed to know their print media decisions were being based upon independently verified circulation data.

These needs persist today although methods of buying and selling print advertising space have changed. ABC continues to serve its members by providing needed data in useful formats.

Verified Circulation

While today's media planning is dependent upon a variety of research – subscriber demographics, for instance – the cornerstone of all this data continues to be verified circulation figures.

Many publishers base their advertising rates on circulation. Buyers use circulation figures to decide where their advertising budgets should be spent. With an ABC audit, publishers can offer buyers an independent verification that their circulation claims are accurate.

ABC auditors examine and evaluate publishers' circulation claims by checking such items as press runs, distribution methods and financial records.

The auditors' findings become the Audit Report, an ABC-produced report containing comprehensive breakdowns of the publication's paid circulation and, where ABC rules allow, an analysis of non-paid circulation. Audits generally are conducted annually, although some smaller circulation publications have audits done every other year.

ABC Reports

ABC provides circulation information to its members in a variety of reports and formats. Audit Reports are supplemented every six months by statements that publisher members submit to ABC. These Publisher's Statements, which are subject to audit, are issued by ABC to provide the most up-to-date information possible.

From these basic reports come a number of other reports. For instance, FAS-FAX reports compile pertinent information from all Publisher's Statements.

Most circulation information is available either in hard-copy formats or electronically through ABC's Circulation Data Bank. The Data Bank maintains county circulation and household data on the newspapers and periodicals in the service. Members can request custom reports that can include specific ABC data, the member's own proprietary data and other information. Data Bank report formats include personal computer diskettes, laser-printed reports, magnetic tape, annual reference volumes and on-line through timesharing services.

Foreword

The ABC NEWSPAPER CIRCULATION FACTBOOK has been published annually since 1971, when it was developed at the request of Canadian media planners for a convenient and comprehensive reference source on newspaper circulation and coverage in Canadian markets. It can also be obtained in diskette form at moderate cost.

Data reported in this Factbook are derived from the latest ABC Audit Report for each member newspaper. Much of the circulation data reported herein can be readily updated from subsequent ABC FAS-FAX and member Publisher's Statements.

In addition to the Factbook, ABC offers a variety of computer generated Data Bank services covering county-unit tabulations structured to meet users' specific requirements. Numerous Data Bank reports and services are available without charge to ABC members. Further information on these services is available on request from any ABC office.

Introduction

The Canadian FACTBOOK consists of three major parts, plus a map section. Part I contains five sections of data for Daily, Saturday and Sunday issues of daily newspaper members and the markets they serve. Part II provides circulation and coverage data for weekly newspaper members. Part III provides circulation and coverage data for both daily and weekly member newspapers. Each section is printed on a different color for easy reference. Provincial maps at the back of this volume depict boundaries as defined in the 1986 census. Only those towns where ABC member newspapers are located, plus others which have a census population of 1,000 or more, are included.

SECTION A - Individual Newspaper Circulation by Market, County, Census Division

Section A shows paid circulation coverages from the most recent ABC Audit Report for daily newspaper members in Part I and weekly newspaper members in Part II. These data are reported alphabetically within provinces which are listed geographically from east to west.

County and Census Division circulation analysis follows the listing of market circulation averages. Paid circulation not analyzed by county or census division is included in the "Remainder of Circulation" total. An asterisk identifies each newspaper's county or census division of publication.

The circulation/occupied household ratio is reported for each reporting market. The percentage of total paid circulation is shown for each component figure. Map reference coordinates shown for each newspaper's city of publication will aid in locating markets on the maps located at the back of this volume.

French language newspapers are identified with the code (F) following the newspaper name.

SECTION B - County and Census Division Circulations

These alphabetical listings of counties or census divisions by province in Parts I and II show circulation and household coverage ratios of each member paper with significant circulation in the area.

SECTION C - Daily and Weekly Newspaper Circulation

These sections in Parts I and II provide daily newspaper circulation and coverage in major markets and weekly newspaper circulation in alphabetical sequence by province and city.

SECTION D - Five Year Circulation Trends in Metropolitan Areas

Section D of Part I provides five-year circulation and coverage data for all daily newspapers in the 25 census metropolitan areas.

SECTION E - Ranking by Circulation Size

Section E of Part I ranks daily newspapers by total circulation.

Map Section

Provincial maps, placed at the back of this book, depict county or census division boundaries as defined in the 1986 census. Only those towns which contain an ABC publisher member, and others with 1,000 plus populations, are shown.

Map reference coordinates shown in each newspaper city of publications will aid in locating markets on maps.

Users' Guide to Part I

DAILY NEWSPAPER ANALYSIS

Part I analyzes circulation data for daily newspapers and the markets they serve. Each of the five sections is printed on a different color paper for ease of reference. Map reference coordinates relate to the provincial maps located at the back of this volume.

SECTION A - Daily Newspaper Circulation by Market, County, Census Division

This section lists total paid circulation averages for each newspaper, extracted from the most recent ABC Audit Report. Separate figures are reported for each of the established market areas and for the total average paid circulation. Circulation figures are also reported for Census Metropolitan Areas. Listings for all newspapers published within these census-defined markets report circulation for the market within which each is published.

The individual newspaper's county or census division circulation data follows the listing of market data. Home market circulation is shown plus figures for other counties or census divisions where the newspaper reports circulation of at least 250 copies or a 5 percent circulation/occupied household ratio. Other paid circulation is included in the "Remainder of Circulation" total.

Occupied households shown for newspaper markets and Census Metropolitan Areas are ABC estimates for the year in which the audit period ended. Occupied households for Counties and Census Divisions are 1989 estimates.

It should be noted that circulation figures for Census Metropolitan Areas, Counties and Census Divisions are extracted from Paragraph 3 of ABC Audit Reports and, as such, do not necessarily represent the average for all daily issues. Under ABC rules, a separation of averages is required where daily circulation on a given day or days is considered abnormally high or low.

SECTION B - County and Census Division Circulation & Coverage

This alphabetical listing of counties or census divisions by province reports the circulation and circulation/occupied household ratio of all daily newspaper members having circulation of at least 250 copies or a 5 percent circulation/occupied household ratio. As in Section A, 1989 occupied household estimates are shown.

SECTION C - Major Market Circulation & Coverage

Publisher reported or ABC compiled circulation data coupled with 1989 estimated population and occupied households are provided in this section for major markets where ABC member daily newspapers circulate. These major markets are listed by size, according to the total market population. Map reference coordinates, provided to aid in locating markets, relate to the provincial maps located at the back of this volume.

Newspaper circulation within these census-defined areas with the circulation/occupied household ratio is shown for all member daily newspapers having circulation of at least 500 copies in the area. Newspapers published in the market area are identified by an asterisk.

SECTION D - Five-Year Circulation Trends In Metropolitan Areas

Five-year trend data on circulation of daily newspapers in the 25 Census Metropolitan Areas are included in this section. These include coverage ratios, single copy sales, subscription sales and their proportions of total circulation.

SECTION E - Circulation Rankings

The table in this section ranks daily newspapers by total circulation for each edition.

Part I

SECTION A

Analysis of Daily Newspaper Circulation
By Market, County, Census Division, Regional District or Territory

---

This section lists paid circulation averages for each newspaper, extracted from the most recent ABC Audit Report. Separate figures are reported for each of the established market areas and for the total average paid circulation. Circulation figures are also reported for Census Metropolitan Areas. Listings for all newspapers published within these census-defined markets report circulation for the market within which each is published.

The individual newspaper's county or census division circulation data follows the listing of market data. Home market circulation is shown plus figures for other counties or census divisions where the newspaper reports circulation of at least 250 copies or a 5 percent circulation/occupied household ratio. Other paid circulation is included in the "Remainder of Circulation" total.

Occupied households shown for newspaper markets and Census Metropolitan Areas are ABC estimates for the year in which the audit period ended. Occupied households for Counties and Census Divisions are 1989 estimates.

It should be noted that circulation figures for Census Metropolitan Areas, Counties and Census Divisions are extracted from Paragraph 3 of ABC Audit Reports and, as such, do not necessarily represent the average for all daily issues. Under ABC rules, a separation of averages is required where daily circulation on a given day or days is considered abnormally high or low.

Part I

SECTION B

Daily Newspaper Circulation & Coverage Analysis By County, Census Division, Regional District or Territory

This alphabetical listing of counties or census divisions by province reports the circulation and circulation/occupied household ratio of all daily newspaper members having at least 250 copies or 5 percent circulation/occupied household ratio. As in Section A, 1989 occupied household estimates are shown.

Audit Bureau of Circulations

Part I

SECTION C

Daily Newspaper Circulation
Major Market Circulation & Coverage Analysis

Publisher reported or ABC compiled circulation data coupled with 1989 estimated population and occupied households are provided in this section for major markets where ABC member daily newspapers circulate. These major markets are listed by size, according to the total market population. Map reference coordinates, provided to aid in locating markets, relate to the provincial maps located at the back of this volume.

Newspaper circulation within these census-defined areas with the circulation/occupied household ratio is shown for all member daily newspapers having circulation of at least 500 copies in the area. Newspapers published in the market area are identified by an asterisk.

Audit Bureau of Circulations

Then and Now

The need for verified, audited circulation is just as important today as it was in 1914 when the Audit Bureau of Circulations was formed. While our basic role to audit and disseminate data remains unaltered, our founding fathers might not recognize us today.

Electronic auditing has long since replaced green eyeshades and ledger pads. Instant computer access to ABC-audited circulation data has replaced manual research and calculations. And ABC applications programs allow print media planning through desktop PCs.

While just a small group of visionaries gave birth to ABC, 4,800 advertisers, publishers and advertising agencies make up our membership today.

The Audit Bureau of Circulations upholds a proud tradition of self-regulation and service innovations. And we thank you—our members—for making that possible.

Integrity in a changing world.
Then and now.
Audit Bureau of
Circulations

Part I

SECTION D

Daily Newspaper Circulation
Circulation Trend Data in Census Metropolitan Areas

Five year data on circulation of daily newspapers in the 25 Census Metropolitan areas as included in this report for the first time. These include coverage ratios, single copy sales, subscription sales and their proportions of total circulation.

of Circulations

Users' Guide to Part II

WEEKLY NEWSPAPER ANALYSIS

Part II of the ABC Canadian Newspaper FACTBOOK provides analyses of data for ABC-member weekly newspapers.

Each of the three sections in this part is printed on different color paper for easy reference. Map reference coordinates used in this book relate to the provincial maps located at the back of this volume.

Weekly newspaper members of ABC are audited annually when published in the city or City Zone of a daily newspaper member and bi-annually in other areas. Members of a group audit plan may be audited less frequently but at least once every four years. In Section A, a crosshatch symbol is used to identify those newspapers which are audited annually. Occupied households for Counties and Census Divisions are 1989 estimates.

SECTION A - Weekly Newspaper Circulation by Market, County, Census Division

This section lists total paid circulation averages for each newspaper, as reported in the most recent ABC Audit Report.

Each newspaper's county or census division circulation data follows the listing of total circulation averages. Home market circulation is shown plus any county or census division where a newspaper reports circulation of at least 250 copies or a 5 percent circulation/occupied household ratio. Other paid circulation is included in the "Remainder of Circulation" total.

SECTION B - Weekly Newspaper County and Census Division Circulation & Coverage

This alphabetical listing of counties or census divisions by province reports the circulation and circulation/ occupied household ratio of all weekly newspaper members having circulation of at least 250 copies or a 5 percent circulation/occupied household ratio.

SECTION C - Circulation of Weekly Newspapers by Province and City

Circulation of each ABC weekly newspaper member is reported in alphabetical sequence by province and city. Separate columns identify home county or census division, frequency of publication and total average paid circulation.

Part II

SECTION A

Analysis of Weekly Newspaper Circulation By Market, County, Census Division, Regional District or Territory

This section lists total paid circulation averages for each newspaper, as reported in the most recent ABC Audit Report.

Each newspaper's county or census division circulation data follows the listing of total circulation averages. Home market circulation is shown plus any county or census division where a newspaper reports circulation of at least 250 copies or a 5 percent circulation/occupied household ratio. Other paid circulation is included in the "Remainder of Circulation" total.

Users' Guide to Part III

DAILY & WEEKLY NEWSPAPER ANALYSIS

Part III of the ABC Canadian Newspaper FACTBOOK provides analyses of County and Census Division Circulation & Coverage for both daily and weekly ABC-member newspapers within the same listings. For easy reference, the section is printed on the same color paper as the corresponding sections in Parts I and II.

As in Parts I and II, occupied households for Counties (Census Divisions) are 1989 estimates. Map reference coordinates used in this book relate to the provincial maps located at the back of this volume.

SECTION A - Daily & Weekly Newspaper County and Census Division Circulation & Coverage

This alphabetical listing of counties or census divisions by province reports the circulation and circulation/occupied household ratio of all daily and weekly newspaper members having circulation of at least 250 copies or a 5 percent circulation/occupied household ratio.

Part III

SECTION A

Daily & Weekly Newspaper Circulation & Coverage Analysis By County, Census Division, Regional District or Territory

This alphabetical listing of counties or census divisions by province reports the circulation and circulation/occupied household ratio of all daily and weekly newspaper members having circulation of at least 250 copies or a 5 percent circulation/occupied household ratio. An asterisk denotes that the newspaper is published within the county.
